“The Entrepreneurs of the Future” Kick-off meeting - The first Transnational Project Meeting

A Project to be developed until July 2020 by teachers and institutional representatives from different European countries: Germany, Finland, Iceland, Poland, Sweden and Portugal. The intention here is to reinforce the European spirit and to improve and perfect educational approaches through the sharing of knowledge and experiences by the delegates of the countries involved.

The Portuguese team: the President of the Portuguese Association of Environmental Education (ASPEA), Joaquim Ramos Pinto, and three teachers from Alves Martins Secondary School (Viseu), Alda Nabais Franco (Physics and Chemistry), Fátima Pinho (Biology and Geology) e Graça Pinto Pereira (English and German).

The project’s first meeting took place this year, from October, 28th till November, 2nd in the wonderful city of Lüchow, Germany. This was an encounter for sharing information about the different countries’ educational systems, teaching practices and the exchange of ideas and points of view regarding a common future. The partners also drew up a schedule for future actions and objectives to fulfil in the scope of this teachers’ mobility programme, whose final goal is to spread and implement the best practices in Europe in the field of training programmes for young Entrepreneurs of the Future.

It is of the utmost importance, that we, teachers and trainers, endow these future entrepreneurs with the necessary tools for them to be ready for entering the world of work. We want them to be responsible, innovative, well-informed, and well-prepared to face up to a world that is constantly changing. We want young people to be aware of the value of their ideas and actions for the future of humanity and, perchance, for rescuing the Planet.

“The Entrepreneurs of the Future”, it’s them, our youths!
